Crocker Hill
No tracks exist in this area, making travel extremely hazardous. This route traverses private property, Aboriginal lands and National Park.
Permits from ALL authorities and police are required before entry, which is usually granted for scientific or cultural research only.
Hay River Watercourse
During large floods the Hay River divides into a network of small streams. These watercourses are hidden in the dune corridors on either side of the track.
Large Red Gum
Due to the fragile nature of this area, please explore carefully on foot only.
